

Background: Engineering, Physics, Environmental Studies or any other relevant fields

Location: Chalandri, Athens

Job type: Permanent, full-time position

PROMEA is a strategic partner for EU public administrations, knowledge organisations, economic actors, and civil society stakeholders. Our key focus areas of work include policy adaptation to climate change, innovation, transformative investment policies, competitiveness, inclusion, environmental awareness, and vocational training on climate crisis policies. PROMEA conceives, develops and coordinates the implementation of European projects to address these challenges, linking knowledge, policy, training and business organisation.

Job description:

The role involves research, analysis, technical writing, and proposal development in the field of energy transition, focusing on investment analyses, feasibility studies, policy reports, and strategic action plans. The vacancy is primarily a consulting function: tasks involve drafting technical studies, investment analyses, policy reports, feasibility assessments, and strategic action plans in the field of energy transition.

Day-to-day tasks include:

- Draft technical and policy reports that explain complex energy concepts, models, and investment assessments in clear, structured, and precise language.
- Survey bodies of technical literature, understand and solidly summarise the state of the art on the issues investigated.
- Design and/or carry out evidence collection (e.g. questionnaires, case studies, statistical data).

Candidate profile:

- University degree and post-graduate studies in Engineering, Physics, Environmental Studies or other relevant fields.
- Proficiency in English.
- At least **2 years of proven work experience or a PhD** in a relevant field.
- Familiarity with the preparation of business plans in the domain of renewable energy.
- Proven ability to conduct research, carry out analysis and draft reports on energy issues.
- Prior experience in providing evidence and analysis on energy investment plans and proposals.
- Ability to understand and synthesise large amounts of complex information under short deadlines.

Offered:

- Salary range: 1,200-2,300 €
Individual salary offers will be made based on each candidate's background, skills, and relevant experience.
- Substantial learning, personal and professional growth.
- Career development opportunities and growth within the organisation.
- Opportunity to work with (and learn from) experienced senior colleagues and cutting-edge knowledge organisations and businesses from across Europe.

The position requires residence in Athens and the selection process takes place only in person in Athens.
